CWD

Whereas Polk, Burnett and Barron counties are deemed CWD areas due to one deer testing positive for CWD in another county the said County of Washburn; we are requesting Polk, Burnett and Barron be exempted from CWD restrictions ie baiting, feeding and euthanizing fawns.

Thereas CWD is cropping up in new eastern areas in the state we would propose strict restrictions on the release of fawns.

The attached list of people have signed their concern to change the old admin DNR restriction on CWD area's. We are concerned with the deer herds and the economic devastation that could occur if the restrictions are kept in place in our area.

We would like this presented at the spring hearing April 18th 2013.

Thank you,

TAMARA LARSON
