100407 Resolution 1 16 07

Think and Look for Safety First while hunting.

100407

Hunters think twice and look before pulling the trigger. To many hunters shoot first and look afterwards then it is to late after they shot themselves or another hunter. The DNR should pull their Hunting license for 5 years and get those trigger happy hunters out of the woods.

The DNR will pull your hunting license for 3 years for shooting a deer out of season, but a hunter can shoot another hunter or person and the DNR won't even pull their license.

At the present time the DNR values the life of a deer more than a human being.

16 yes
13 no

The question added w/author permission

The question: Would you be in favor of the DNR pulling a hunter's license, for 5 years, if that hunter shoots another hunter?

See over for note!
