Title 10 FT Rule 2

180211

Problem - overcrowding on ice covered lakes by ice anglers

Whereas there is an ever increasing number of ice anglers thereby creating more competition over prime locations and increased overcrowding of shacks and anglers this can cause unsafe conditions due to thinner ice and transportation issues and create social conflicts among anglers

Be it resolved that the conservation congress at its annual meeting held in Eau Claire county on April 11, 2011 recommends that the conservation congress work with the department to take action to correct this situation by introducing a rule stating that no one may drill a hole, fish, or place a shack nearer than 10 FT from another angler without

that anglers permission.
