290312

Early Catch and release season for muskies on the Wisconsin river system with all of its lakes and tributaries.

Problem: Fishing season is open during march and April on the Wisconsin river system on every spiecies except for muskies and sturgeon. If you are fishing for pike, you use the same lures and technique that you do for musky fishing. If someone sees you pike fishing they can say that you are fishing for musky. This could result in a ticket.

Solution: Make a catch and release musky season on the Wisconsin river with all of its lakes and tributaries from the first weekend in March to the first weekend in May or June, depending on where you are to Hwy 10.
