Title: Spring Turkey Application and Hunting Season.

The problem: The spring turkey application process is an unnecessary burdon and can be simplified. There is no need to have a preseason application when a license could be purchased at an authorized sales office prior to the actual Spring Season.

Other States that have a Spring Turkey hunting seasons allow license purchases in a simple over the counter without seperate time periods rather inclusive dates. By doing so this would decrease the cost of obtaining a license and simplify the control of licenses.

Be it resolved, that the Conservation Congress at its annual meeting ~~held in Buffalo County~~ on work with the department of Natural Resources to correct this situation by introducing rule changes to allow this simplified Spring Turkey hunting seasons
