To whom it may concern,
I implore you think of the long term consequences of this project both in terms of precedents that it will set and the direct effects that will result from the pulling of 7 million gallons of Lake Michigan water daily with the pumping back in of water contaminated with heavy metals. Allowing this travesty is beyond short-sighted and leaves our children with a massive burden. It seems to me that this plan goes against the Great Lakes Water compact and should be denied. This deal is bad for Wisconsin, bad for the Great Lakes, and bad for our future. Please listen to the people and consider that a healthy environment is vastly more important than making potential economic gains.

Respectfully,

Ryan Van Remmen, BA
