To whom this may concern,
I would like to voice my opposition to the City of Racine water diversion plan to allow Foxconn to use water diverted from Lake Michigan. Specifically I do not believe that Foxconn has met the standard of only diverting water for public use. Additionally, i believe that to approve this application would set a negative precedent in regards to the Great Lakes Compact. If this diversion is allowed then other private organizations will have the ability to site this approval in other states and territories that border the Great Lakes when making their own water diversion plans. Plans that may dwarf the Foxconn plan in water usage. This concern is amplified by the fact that the Great Lakes Compact is an international agreement. We need to set an example of stewardship to our neighbors in Canada if this agreement is going to survive long-term. Please know that this decision will play into my opinions of political candidates this coming November. Thank you for your time and consideration of my opinion.
