I strongly object to the Lake Michigan water diversion requested by the City of Racine.

Allowing Racine to withdraw millions of gallons of water every day in order to transfer it to “rural Mt. Pleasant”, aka the Foxconn facility, completely subverts the intent of the Great Lakes Compact.

A large portion of that water would be “consumed” by the facility. It would not be used for drinking water by a “straddling community”. This diversion does NOT conform to the stipulations within the Compact.

Deny the application by the City of Racine to withdraw water from L Michigan to divert to the Mt. Pleasant area.
