To whom it may concern,

My name is Meghan Wersel and I work for the Waukesha County Land Conservancy, located in Pewaukee, Wisconsin. I hope this message gets to you in time to be considered.

As a long time resident of Milwaukee County, and a huge supporter of keeping our Great Lakes clean and full for many generations to come, I hope you will consider rejecting or negotiating Foxconn's request to use 7 million gallons of Lake Michigan water -- with no complete plan of returning that same amount in the same quality back to the lake.

Not only will this development affect local communities and economies, this will greatly effect the Great Lakes for years to come -- for Wisconsin residents, as well as all of the other surrounding states and Canadian provinces.

Please consider the immense effect this will have on the local environment (wildlife and plant habitat) as well as tourist and sportsman effect, due to the unknown consequences of this usage.

We hope that all voices will be heard. Please think about those that may not have a voice as well.

Thank you for your time.
Sincerely,
Meghan Wersel
