Subject:	Foxconn's use of Lake Michigan water
Date:	Wednesday, March 21, 2018 5:23:25 PM

Dear Wisconsin elected officials and civil servants:

I am writing to express my opposition to Foxconn's proposed consumption of Lake Michigan water.

The state of Wisconsin needs to thoroughly analyze the immediate and long term impact on Lake Michigan of Foxconn's proposed consumption of the lake's water.

While this analysis takes place, Wisconsin government agencies need to halt any work to build the Foxconn Wisconsin campus. In addition, public hearings need to be reopened so that Wisconsin citizens have the opportunity to participate in the decisions involved in use of our fresh water (Lake Michigan).

The invaluable, life sustaining resource Lake Michigan provides must be protected for countless generations to come, not traded away for an unguaranteed promise to to increase the number of jobs in Southeastern Wisconsin.

Sincerely,
Karen Peugh
