Subject:	Racine Diversion of Great Lakes" water for FoxConn
Date:	Wednesday, March 21, 2018 7:58:08 AM

I am writing to call on the DNR to refuse permission to allow a diversion of 7 million gallons of water from Lake Michigan for use by the private corporation, Foxconn. There should be no doubt that granting this permission would constitute not only a violation of the Great Lakes Compact international agreement, but would be gross violation of democratic principles and rights and environmental stewardship. I am stunned that the DNR has allowed the proposed diversion to advance as far as it has, especially since there is no real legal basis for this diversion to a city that does not actually have the right to request this water. The city of Racine is over-reaching its own legal rights by requesting a diversion on behalf of Mount Pleasant. I am deeply concerned about the enormous loss of water and the lack of regulation and control over the use of the water and the resulting contamination that use will entail for all of the State and region. I call on the DNR to act swiftly to deny this permission for water diversion for a private corporation.
