Subject: Racine Diversion Application
Date: Wednesday, March 21, 2018 10:24:21 PM

Please deny the application from Racine Water Utility for a diversion to Mt Pleasant. From all I have read, the Great Lakes Compact was designed to protect our most valuable resource from misuse by private companies for their own profit. Today it was announced in numerous newspapers that the lead contractors have been selected and construction could begin in about 60 days. Not one of these newspaper articles was there any mention that the Wisconsin DNR has not yet decided on the diversion request. It seems that Foxconn and the village of Mt Pleasant believe that this ruling by the DNR has already been decided in their favor.
