Spring 2015 Conservation meeting Resolution

Problem

the DNR has recomended putting the new 15/5 panfish limit on Rib Lake in 2016

The problem is That There are very few perch and bluegills in The lake, so fisherman would be limited to 5 smaller crappies. It would hardly pay to launch a boat. The Rib Lake Area Fish + Game Recomends that the DNR change to a 25/10 program on Rib Lake
