Subject:	I oppose the City of Racine"s request to divert more water from Lake Michigan
Date:	Wednesday, March 21, 2018 3:17:57 PM

Hello,

I would like to urge the Wisconsin DNR to deny the City of Racine's application as it stands to divert 7 million gallons of Water from Lake Michigan to essentially be used for the proposed Foxconn facility.

This application is not only highly concerning because of its impact to the drinking water source for millions of people, but also because it violates the protections being set out by the Great Lakes Compact.

Allowing this application to move forward as it stands sets a dangerous precedent that industry can utilize and pollute our drinking water sources. The application also does not meet the following requirements set out in the DNR review fact sheet:
