Subject:	Foxconn Lake water diversion
Date:	Thursday, March 15, 2018 10:06:23 PM

Here are 3 reasons I believe that the DNR should not approve diverting 7 million gallons of water a day to the foxconn plant in Mount Pleasant.

1)I believe that diverting 7 million gallons a day of lake Michigan water for a single industrial plant violates the Great Lakes Compact.

2)I think it is obvious that consuming as much 3 million gallons a day for a single entity will have disastrous effects on Lake Michigan and surrounding communities.

3) The entire state of Wisconsin uses about 8 million gallons of water a day currently. By adding the diversions of New Berlin, Waukesha and now Foxconn, the DNR will have approved of doubling this amount in 2 years.

It appears that not enough scientific studies have been made to calculate the effects of this diversion. Foxconn does not have a good track record of having environmentally sound production practices.

Sincerely,
Gary Haag
