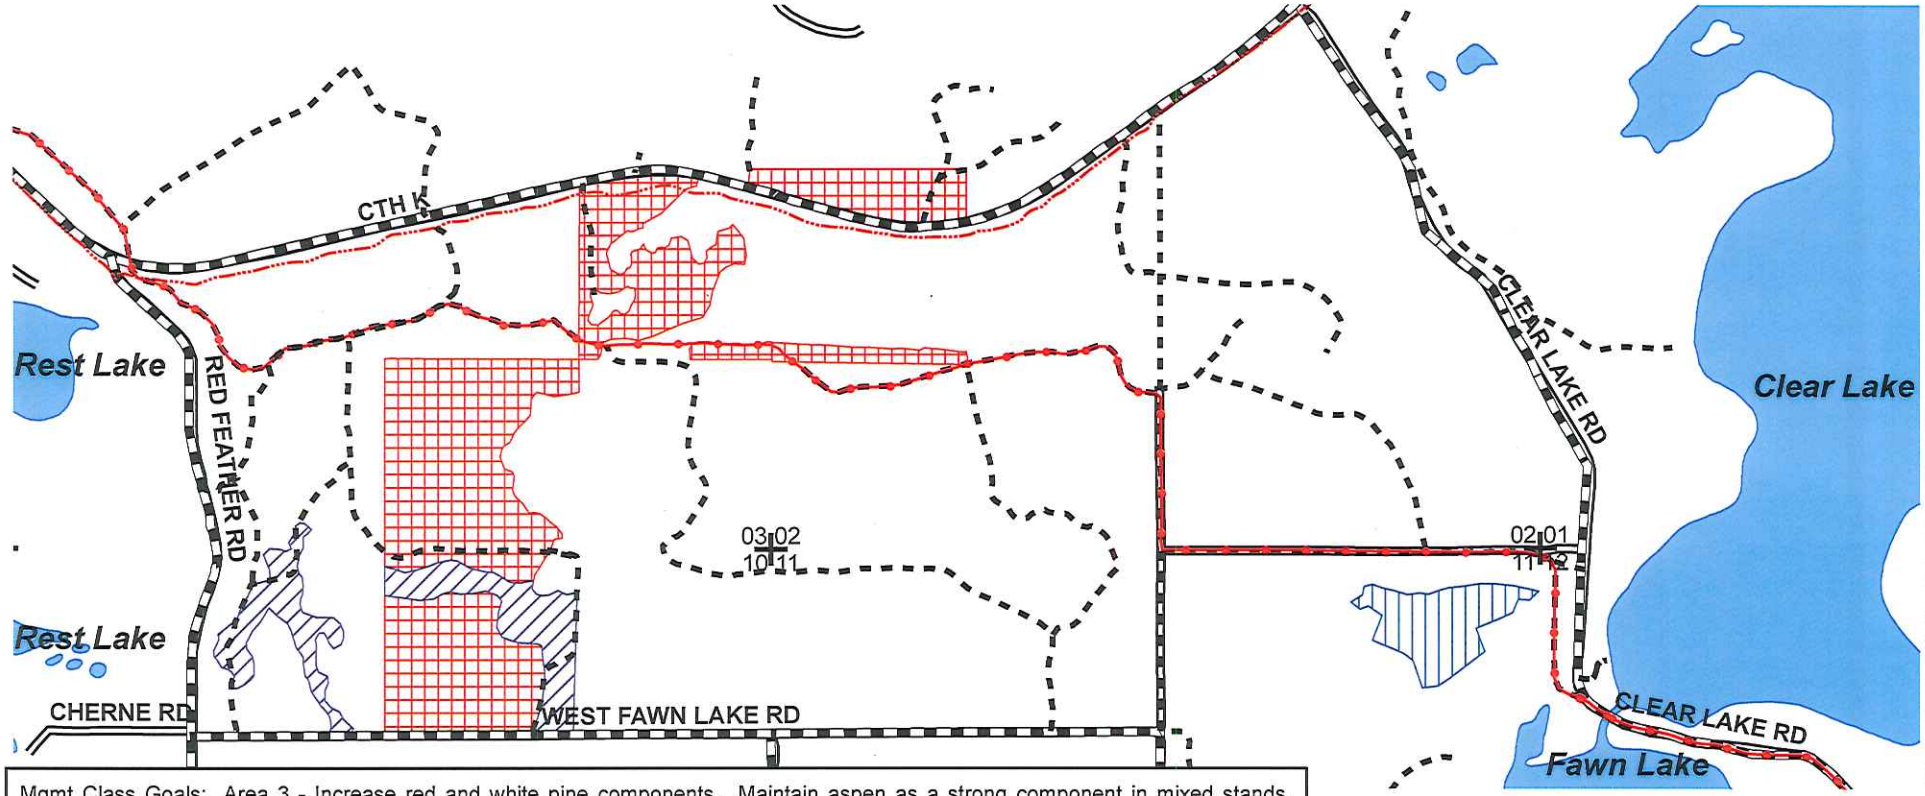
Northern Highland - American Legion State Forest
C236H Stand 6; C241H Stand 4; C248H Stands 1, 7, 9, & 14
Clear & Fawn Lake Road - 121 acres
Town of Manitowish Waters, Vilas County, T42N R5E Sections 2, 3, 10 & 11
NHAL Master Plan: Area 3 - Vilas Sandy Plains North Forest Production Area



Mgmt Class Goals: Area 3 - Increase red and white pine components. Maintain aspen as a strong component in mixed stands. Manage for current levels of red oak, white birch, jack pine, fir-spruce, and northern hardwood.

Stand Attributes, History, Prescription: Most of this proposed sale is a new acquisition from the Town of Manitowish Waters in 2014. The red pine area (St 6, 7, & 14) is 89 to 96 years old and will be thinned. Overmature short-lived species will also be cut. The aspen(St 1 & 9) is 53 years old and will be regenerated. Red& white pine pockets within this stand will be thinned. Stand 4 is an 82 year old norway spruce plantation with a mix of other species. The south half of the stand was thinned in 1994 but there was no cutting on the north end. The spruce will be thinned and short-lived species will be cut.

Biomass Suitability: No, the sale contains some areas with restricted soils.

Recreation/Aesthetic Concerns: The paved bike trail will be temporarily rerouted or closed if cutting occurs during the active season. The snowmobile trail will be posted if cutting occurs in the winter. Camp Jorn will also be consulted as they use many of the woods roads as horseback riding trails.

Seasonal Restrictions, Access Concerns: The existing road system should be adequate for access to all areas.
