Subject:	Foxconn - Racine"s bid for water from Lake Michigan
Date:	Tuesday, March 20, 2018 7:15:58 PM

This is in follow up to the public hearing on March 7th regarding Racine's bid to divert water from Lake Michigan for Foxconn.

I am strongly opposed to this request and, as a Wisconsin taxpayer and a citizen that has lived here my entire life, request that this bid be denied. There were many compelling and well-stated reasons cited in the hearing on March 7th that should raise serious concerns about this request and the potential negative impact it would have on our lake and our environment. Not to mention that this diversion is requested on behalf of a foreign business interest. It's quite clear that it would be Foxconn that would stand to benefit at the detriment of Wisconsin taxpayers and our environment. I hope and pray that as representatives of DNR, that you can stand firm and uphold the mission of this organization to do what is right and just and to do what is necessary to protect one of our greatest and most precious resources. Please, please deny this request. The result of your decision is most certainly destined to have a far-reaching impact and one that you will have to live with forever.

Very sincerely,
Trina Smars
