Please deny the Foxconn water diversion request on these grounds:

1)The 7.5 million gallons diverted daily and 4.5 million gallons returned daily are estimates not concrete figures.

2)This diversion violates the great lakes compact as it is for private not public use.

Foxconn is known to be a horrible polluter and employer. Technology changes on a dime. If they succeed in this , they will only be the 1st.This isn't industry we want.

Please protect Lake Michigan, our greatest natural resource.
