Wisconsin Department of Natural Resources
Monitoring the Implementation of Property Master Plans

Property or Properties: **Lakeshore State Park**

Year Master Plan was Approved: 2001

Property-wide

MASTER PLAN OBJECTIVES Real Estate Mtg.	**Recent Park Land Acquisitions / Transactions** • Acquire acreage within the expanded project boundary totaling 22 acres.
Accomplishments 2012	*Acreage previously acquired – no action in 2012*

Property-wide

MASTER PLAN OBJECTIVES Recreation Mtg.	Type 4 Recreational Use • Provide areas offering opportunities for intensive recreational use activities and experiences. Facilities, when present, may provide a relatively high level of user comfort, convenience and environmental protection Recreation • fishing • walking • jogging • biking

	• kayaking, canoeing and other small boat activities • kite flying and other open space activities • rollerblading • organized events - groups such as boy scouts/girl scouts, school children, senior citizens • outdoor experience/educational opportunities • dog walking • carriage rides • picnicking • bird watching • sightseeing
Accomplishments 2012	*Areas/support previously provided – no action in 2012 other than maintenance.* *Fishing dock was repositioned closer to shore and piles re-driven due to ice push out.*

Property-wide

MASTER PLAN OBJECTIVES Recreation Facility Development	Facility • Lakewalk • Maritime basin • Quite water basin • State park visitor center • Island
Accomplishments 2012	*No action in 2012 other than maintenance* *Park still without visitor center or facilities*

Property-wide

MASTER PLAN OBJECTIVES Non-Recreation Mtg.	Type 4 Recreational Use – Non-Recreational Development • Any land or vegetation management prescription or method that supports the master plan's management objectives for the area and is consistent with the site's ecological capability may be used. • Resource management developments such as dams, dikes, ditches, habitat improvement devices, and constructed ponds and other types of non–recreational structures, that harmonize with the surrounding landscape to the degree practicable and feasible may be present • Visual quality management techniques shall be prescribed, to the degree feasible and practicable, as appropriate for the specific management objectives, resource capabilities, and the degree and type of aesthetic concern for the area. Vegetation • Approx. five acres of native short grass prairie • Approx. one acre of upland trees and shrubs • Remainder of vegetation will be managed in a mowed and manicured manner.
Accomplishments 2012	*Acre of shrubs/trees never planted - prevented by agreement with city when park built.* *Weed control in prairies on-going in 2012 – spot spraying, pulliong, cutting and dead-heading*
