WI Wolf Management Resolution (5)

Whereas WI wolves are very baddly mismanaged by the WDNR, and causing many problems for people living in Wisconsin Wolf management zones 1 and 2, and costing the taxpaying public lots of money, it is suggested that the WWMP be scrapped. 6/10/06

Whereas WI wolves are really managed by the USFWS under which wolves are an endangered species, it is suggested that WI wolf management break all USFWS ties, and a committee of concerned citizens appointed by the Conservation Congress do the managing of wolves and all other predators.
