RE: Lake Michigan water withdrawal permit, City of Racine, on behalf of Village of Mount Pleasant on behalf of Foxconn

You must deny the permit submitted by the City of Racine on behalf of the above-named entities since the request neither complies with a) the intent of the Great Lakes Compact to protect these Lakes from increasing pressures for their exploitation nor b) the Compact's requirement for diversion on behalf of the public (Please read on.)

As stewards of the "Great Waters" that serve as the identifying borders of our state, you are responsible to current and future resident generations - those living within Wisconsin's borders and at least those within the eight Great Lakes states. Please **steward** these incomparable planetary waters as waters elsewhere dry and disappear.
You are not considering what this will do to Wisconsin in the future.
Please do not grant Foxconn access to our beautiful lake.
