Subject:	I am opposed to the city of Racine water diversion application
Date:	Sunday, March 18, 2018 9:42:31 AM

Dear Sirs:
In the long run water is our most valuable resource and our Great Lakes provides us with a reassuring supply as long as we cherish and protect it.
I consider the city of Racine water diversion application the same as diverting that amount of water to China. I have concerns that water returned to Lake Michigan will never be the same as the pure water diverted to Foxconn.
Hard decisions such as this one may have been necessary when unemployment was high. Now unemployment is very low so the pressure to waste an environmental resource in pursuit of jobs is not defensible or necessary.
I urge you to reject the application.
Thank you,
Paul Schoenfeld MD
