Subject:	Comment on Foxconn project
Date:	Thursday, March 15, 2018 12:29:28 PM

To Whom It May Concern:

I strongly oppose allowing the Foxconn project to move ahead for the following reasons.

1. This facility is not in the Great Lakes Basic as stipulated by the Great Lakes Compact.

2. The water delivered to Mount Pleasant will not be diverted for public consumption, as required by the Great Lakes Compact, but rather to a private, foreign corporation for profit.

3. Based upon Foxconn's own admission, 40% of the water will not be returned to the lake. This represents a significant loss and again, violates the Great Lakes Compact.

4. Rules are not in place for how the water will be managed, treated, or used. A foreign company must be required to follow the same permitting that Wisconsin companies must adhere to.

5. It is a waste of Wisconsin taxpayer money, unlikely ever to be paid back as the technology will be obsolete within the 25 year time frame estimated for payback, and the location ensures that many of the workers will come from Illinois.

Please do not subsidize foreign companies with my tax money and my public waters. You are required to represent the people of the state, not a foreign company.

Sincerely,

Gary Casper
