Subject: Great Lakes Water Diversion for Foxconn
Date: Wednesday, March 21, 2018 10:02:15 AM

Dear DNR;

It is your duty to stand up for the intent of the Great Lakes Compact by denying the water diversion request from the City of Racine for Foxconn. This diversion request, as you know, does not meet the criteria of the Compact.

*It is not being requested for public consumption
*It is outside the basin for water withdrawal .
*Much of the water will not be returned to the lake.

Wisconsin signed on to this international agreement governing consumptive use and water diversions from the Great Lakes. Further, why would we divert our precious Great Lakes water to a foreign owned company? If the DNR allows this diversion, in direct opposition to the compact what will stand in the way of future requests that do not meet the compact criteria?

The DNR's mission is to protect our water and environment not to satisfy the interests of foreign companies who will compromise our environment. Stand firm in opposition and serve the people of WI.

Joan Fritzler,
