To whom it concerns,

I would like to register my concerns regarding the request to divert water from Lake Michigan for use by Foxconn on behalf of the city of Racine.

It does not appear that this request complies with the intent of the Great Lakes compact. Unless deemed to be fully in compliance, this request should not be approved. To do so would be negligent and possibly set a precedent for similar requests in the future.

Please honor the intent of the compact and withhold approval of the Racine water diversion request until fully satisfied that our future of fresh water will be maintained.

Kind regards,
Joe Van Lanen
