Good afternoon,

Thank you for your consideration on the matter of the City of Racine's water diversion application. I am against this application, and I hope that you are as well.

We need to protect Lake Michigan. The Great Lakes are the largest group of freshwater lakes on Earth. Please do not allow Foxconn to drain them and pollute them through the request to pump 7 million gallons per day. Once Lake Michigan is destroyed (through pollution and over-consumption) we can't get it back.

Please say no to this diversion application.

Best regards,

Kallie Jo Kastenson
