Subject: Lake Michigan water diversion
Date: Thursday, March 15, 2018 3:15:57 PM

No doubt we can contribute nothing new to the chorus of disagreement regarding diversion of our great Lake Michigan's water to a community for business purposes. We stand with those who decry the treatment of this natural resource as boundless: it is not. We stand with those who protest the use of precious water for the gain of a foreign business which already stands to benefit from tax breaks that this state cannot afford. We stand with those who question the ethics of this proposed water use. We stand with those who question the integrity of the Wisconsin Department of Natural Resources.

Please make note of these two additional voices who say "No more." No water diversion for Racine. No additional benefits for FoxConn. No questionable prioritizing from branches of WI State government and the Governor. No more.
