Greetings,

As a citizen of Wisconsin I am opposed to the proposed water diversion for the Foxconn development. This diversion clearly goes against the Great lakes Compact and would set an unacceptable president for other diversions. We must maintain the integrity of the Great lakes and not allow any water diversions out of the watershead. The proposal includes disturbing policy that includes use of lake Michigan water without returning all the volume back to the lake, among other things.

Please reject this proposal to allow Lake Michigan water to be diverted for industrial use.

Respectfully,
Bob Ramlow
