Subject:	Pls don"t allow Foxconn to raid Lake Michigan
Date:	Sunday, March 18, 2018 6:02:49 AM

To the DNR:

The spirit and intent of the Great Lakes Compact is to protect our greatest unique and public resource of drinking water. Please do not create the dangerous precedent of allowing Lake Michigan water to be used for private gain. If Foxconn is allowed to exploit our wonderful natural resource, other companies will be sure to follow suit.

As a state with the privilege of being located on the shore of a great lake, we have a huge responsibility to protect it for future generations. We don't want to do something foolish and have our great-grandchildren asking of us: "What were they thinking?"

We have always respected the mission of the DNR – to protect and manage our natural resources. We know that is not always easy, but in the end, as Wisconsin citizens, we do depend on you to do that.

Thank you,

Frank and Joanne Shansky
