Subject:	Please deny Foxconn permit to take 7 million gallons of water from Lake Michigan.
Date:	Wednesday, March 21, 2018 1:26:08 PM

This water will be used for PRIVATE, INDUSTRIAL use, and not for public consumption.

This permit would set a dangerous precedent. Foxconn has stated that 40% of this water will NOT be returned to the lake. In the future, there could be many more Companies with similar demands. And there have been no plans presented for how this water will be treated before it is returned.

Please protect this treasure upon which so many members of the public rely.

Thank you for your attention to this letter.

Sincerely,

Christine Le Page
