Hello,

I strongly discourage the DNR from allowing Race, and Foxconn, from withdrawing this water. Even though some of it will be replaced into Lake Michigan, it will come with dangerous chemicals that will wreak havoc on our Great Lakes.
By your own map, the proposed diversion area does not straddle the Great Lakes Divide, and neither does Racine.
This diversion is a thinly veiled attempt by Foxconn to get around water and environmental regulations put in place for the good of the ecosystem.

Please do not allow Racine and Foxconn to damage the Great Lakes more than they already have been.

Thank you.
