

Notice to the Public – R. Stresau Laboratory, Inc.

The Wisconsin Department of Natural Resources (the department) received a license renewal application on April 3, 2023, from R. Stresau Laboratory, Inc. (Stresau) to continue operation of a hazardous waste treatment facility located at N8265 Medley Road, Spooner, Wisconsin, 54801. The facility currently manages and treats reactive hazardous waste generated on-site, through open burning/open detonation. The application has proposed a continuation of this treatment method for specific wastes. The applicant consultant's contact information is (715) 492-0828 or [ajohnson@sehinc.com](mailto:ajohnson@sehinc.com).

The department also received a request by Stresau to keep portions of the application confidential. The department is currently reviewing the confidentiality request. Once the department has made a determination on confidentiality, an updated version, if applicable, will be made available on the department's website. <https://dnr.wisconsin.gov/topic/Waste/Comment.html> .

Inquiries may be directed throughout the license review process to the department's contact below. Additionally, interested parties can contact the department to be placed on the DNR's mailing list for licensing actions and updates pertaining to this this facility.
