

**Wisconsin Department of Natural Resources  
Natural Resources Board Agenda Item**

**SUBJECT:**

Request that the Board adopt Board Order FH-12-14, proposed rules affecting NR 20 related to minor changes to fisheries administrative code.

**FOR: May 2015 Board meeting**

**PRESENTER'S NAME AND TITLE:** Kate Strom Hiorns, Fisheries Policy Specialist

**SUMMARY:**

The proposed rule addresses minor changes to administrative code relating to the regulation of fishing. The rule is being pursued to ensure the rule language that governs fishing in inland, outlying, and boundary waters is accurate and properly reflects the desired management of Wisconsin waters.

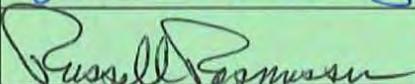

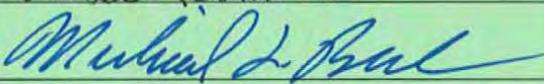

The rule:

- clarifies the boundaries around the Lake Winnebago System in which a spearer can possess an unregistered lake sturgeon;
- changes the Columbia Lake (Columbia County) hybrid striped bass regulations to no minimum length, no bag limit;
- removes the current harvest regulations for walleye on Silver Lake (Columbia County);
- reinstates the allowance of night fishing on the Brule River on Douglas County downstream from Hwy 2 for all species during the regular trout open season;
- amends 3 trout stream names in code to accurately reflect common names and reduce angler confusion of where regulations begin and end;
- extends the boundary of Wisconsin River regulations another 100 feet on the connecting Eau Claire River in Marathon County;
- changes the regulations boundary between the Three Lakes Chain in Oneida County and the Eagle Chain in Vilas County from the county border to the Long Lake (Burnt Rollways) Dam in Oneida County;
- changes all listing of the Neenah-Menasha dam to "dams;" and
- makes set pole/bank pole/setline fishing open seasons for catfish and rough fish the same throughout all Lake Winnebago System waters in Winnebago County.

**RECOMMENDATION:** That the Board adopt Board Order FH-12-14.

FROM: Cathy Stepp, Secretary

SUBJECT: Background memo on Board Order FH-12-14, relating to minor changes to fisheries administrative code

### 1. Subject of Proposed Rule:

The proposed rule addresses minor changes to administrative code relating to the regulation of fishing. The rule is being pursued to ensure the rule language that governs fishing in inland, outlying, and boundary waters is accurate and properly reflects the desired management of Wisconsin waters. The objectives are to:

- remove sections of code that are outdated or have been replaced by other statute or code changes,
- correct errors that occurred during the drafting of rules, and
- add or repeal language to clarify intent of original rules.

### 2. Why is the rule being proposed?

Rule changes are being pursued at the request of fish biologists or based on the finding of mistakes in administrative code.

### 3. Summary of the rule:

The rule:

- Clarifies the boundaries around the Lake Winnebago System in which a spearer can possess an unregistered lake sturgeon. Updates are needed due to roadway construction and naming changes over time.
- Changes the Columbia Lake (Columbia County) 18" minimum length limit and 3 daily bag limit on hybrid striped bass to no minimum length, no bag limit. Hybrid striped bass are considered an invasive species under NR 40, Wis. Adm. Code, and are therefore no longer imported and stocked in any Wisconsin waters. The department would like to continue to allow catch and harvest of any existing striped bass in Columbia Lake under a no minimum length-no bag limit regulation.
- Removes the current harvest regulations (18-inch minimum length limit and 3 fish daily bag limit) for walleye on Silver Lake in Columbia County. The lake has not been stocked with walleye since 2000 and there is no longer a population of walleye in the lake.
- Reinstates the allowance of night fishing on the Brule River in Douglas County downstream from Hwy 2 for all species during the regular trout open season (first Saturday in May - September 30). It prohibits night fishing during the early trout open season (last Saturday in March to May 4) and extended trout open season (October 1 to November 15). The current regulation, which prohibits anglers from fishing at night during the entire open season on the Brule, is an error in code that occurred when the

administrative code was revised in 1992, but the error was not changed in the Trout Regulations Guide until the 2012-2013 fishing season. This caused confusion among anglers and law enforcement.

- Amends trout stream names in code to accurately reflect common names and reduce angler confusion of where regulations begin and end in La Crosse and Monroe counties.
- Extends the boundary of Wisconsin River regulations (year-round open season on bass, pike, walleye) another 100 feet on the connecting Eau Claire River in Marathon County. This proposal extends the regulations to the Schofield Dam, which is a prominent boundary that boaters cannot travel past and is how it is currently enforced.
- Changes the regulations boundary between the Three Lakes Chain in Oneida County and the Eagle Chain in Vilas County from the county border to the Long Lake (Burnt Rollways) Dam in Oneida County. The dam has been used locally as a border and is a more obvious boundary to anglers rather than an invisible county line.
- Changes all listing of the Neenah-Menasha dam to “dams” in 20.20(71). There are two waterways and two dams that should be clarified in code.
- Makes set pole/bank pole/setline fishing open seasons for catfish and rough fish the same throughout all Lake Winnebago System waters. Currently all set pole/bank pole/setline regulations for rough fish and catfish in Lake Winnebago System waters are the same except for the stretch of water between Lake Butte des Morts and Eureka Dam, where a season is open for catfish and closed for rough fish. This was a result of inadvertent wording of code language and there is no biological or management reason for applying the differing regulations for these methods of fishing.

**4. How does this proposal affect existing policy?**

This rule includes minor changes to administrative code that support existing policies and goals.

**5. Has Board dealt with these issues before?**

The Board periodically reviews rule proposals for making “housekeeping” amendments to fishing regulations in administrative code. The most recent Fisheries housekeeping rule (FH-19-12) was approved by the Board in 2013.

**6. Who will be impacted by the proposed rule? How?**

The proposed rule will have minimal impact on sport anglers. The Fisheries Management Bureau works to notify the public of new regulations via press releases, the internet, and fishing regulations pamphlets.

**7. Soliciting public input on economic impact synopsis**

The Department did not receive any comments during the economic impact comment period held December 4 - 18, 2014. A public hearing was held on March 16, 2015, in Madison at which no one attended. No comments were received about the rule.

## **8. Environmental Analysis**

The process for promulgating permanent administrative rules is an equivalent analysis action under NR 150.20(2)(a)20, and no additional environmental analysis is required.

## **9. Small Business Analysis**

The proposed rule will have minimal impact on sport anglers and is not expected to have an economic impact. As with any change in regulations, there will be a requirement for anglers to learn the new rules. However, a majority of this rule change clarifies code to reflect existing policies for which anglers must already comply. The department works to notify the public of new regulations via press releases, the internet, and fishing regulations pamphlets.

The department conducted an economic impact analysis (with a public comment period from December 4-18, 2014) and determined that no individuals, businesses, local governments, or other entities will be adversely affected economically. The proposed rule does not impose any compliance or reporting requirements on small businesses nor are any design or operational standards contained in the rule.

## ADMINISTRATIVE RULES Fiscal Estimate & Economic Impact Analysis

---

1. Type of Estimate and Analysis

Original  Updated  Corrected

---

2. Administrative Rule Chapter, Title and Number

Chapter NR 20, Fishing in Inland Waters and Outlying Waters

---

3. Subject

Minor changes to fisheries administrative code

---

4. Fund Sources Affected

GPR  FED  PRO  PRS  SEG  SEG-S

---

5. Chapter 20, Stats. Appropriations Affected

---

6. Fiscal Effect of Implementing the Rule

No Fiscal Effect  Increase Existing Revenues  Increase Costs  
 Indeterminate  Decrease Existing Revenues  Could Absorb Within Agency's Budget  
 Decrease Cost

---

7. The Rule Will Impact the Following (Check All That Apply)

State's Economy  Specific Businesses/Sectors  
 Local Government Units  Public Utility Rate Payers  
 Small Businesses (if checked, complete Attachment A)

---

8. Would Implementation and Compliance Costs Be Greater Than \$20 million?

Yes  No

---

9. Policy Problem Addressed by the Rule

The rule is being pursued to ensure the rule language that governs fishing in inland, outlying, and boundary waters is accurate and properly reflects the desired management of Wisconsin waters. The objectives are to:

- remove sections of code that are outdated or have been replaced by other statute or code changes,
- correct errors that occurred during the drafting of rules, and
- add or repeal language to clarify intent of original rules.

---

10. Summary of the businesses, business sectors, associations representing business, local governmental units, and individuals that may be affected by the proposed rule that were contacted for comments.

The department contacted several groups during the open comment period December 4-18, 2014, including the Wisconsin Conservation Congress, the Wisconsin Wildlife Federation, the Great Lakes Indian Fish and Wildlife Commission, Wisconsin Association of Lakes, WI Federation of Great Lakes Sport Fishing Clubs and many other similar angling organizations, as well as the League of WI Municipalities, WI Towns Association, and WI Counties Association. No comments were received by the department.

---

11. Identify the local governmental units that participated in the development of this EIA.

No local governments requested to participate in the development of the EIA.

---

12. Summary of Rule's Economic and Fiscal Impact on Specific Businesses, Business Sectors, Public Utility Rate Payers, Local Governmental Units and the State's Economy as a Whole (Include Implementation and Compliance Costs Expected to be Incurred)

The rule will have minimal impact on sport anglers and is not expected to have an economic impact. As with any change in regulations, there will be a requirement for anglers to learn the new rules. However, a majority of this rule change clarifies code to reflect existing policies for which anglers must already comply. The department works to notify the public of new regulations via press releases, the internet, and fishing regulations pamphlets.

The rule does not impose any compliance or reporting requirements on small businesses nor are any design or operational standards contained in the rule.

---

13. Benefits of Implementing the Rule and Alternative(s) to Implementing the Rule

## ADMINISTRATIVE RULES Fiscal Estimate & Economic Impact Analysis

The rule is being pursued to ensure the rule language that governs fishing in inland, outlying, and boundary waters is accurate and properly reflects the desired management of Wisconsin waters. An alternative would be to leave the code as is, which leads to confusion among the public and law enforcement and may also result in inadequate management of fisheries resources.

---

### 14. Long Range Implications of Implementing the Rule

Fishing regulations, such as length and bag limits or season dates, are used as a tool to ensure good fishing exists into the future. The department has used different types of fishing regulations in order to: control angler impacts on fish populations; maintain numbers and sizes of fish in a lake or stream; provide different types of fishing experiences, such as fishing for dinner or for a trophy fish; and make access to fishing as fair as possible.

This rule includes minor changes to administrative code that support existing policies and fisheries management goals.

---

### 15. Compare With Approaches Being Used by Federal Government

Authority to promulgate fishing regulations is granted to states. None of the proposed changes violate or conflict with federal regulations.

---

### 16. Compare With Approaches Being Used by Neighboring States (Illinois, Iowa, Michigan and Minnesota)

Fisheries management rules are generally similar in the states surrounding Wisconsin. Each bordering state regulates fishing by the use of seasons, bag limits and size limits.

ORDER OF THE STATE OF WISCONSIN NATURAL RESOURCES BOARD  
AMENDING RULES

The statement of scope for this rule, SS094-14, was approved by the Governor on August 27, 2014, published in Register No. 705 on October 1, 2014, and approved by the Natural Resources Board on October 29, 2014. This permanent rule was approved by the Governor on \_\_\_\_\_.

The Wisconsin Natural Resources Board proposes an order to amend NR 20.10 (8) and (9); 20.20 (11) (c) 1. a., (11) (k) 1., (16) (a) 2. a., (16) (g) 1. a., (32) (f) 1., (37) (a) 1., (37) (c) 1., (37) (e) 2., (37) (i) 1., (42) (e) 1., (44) (g) 1., (63) (c) 2. and 3., (64) (h) 2., (71) (a) 1., (71) (c) 1., (71) (cm) 1., (71) (d) 1., (71) (e) 2., and (71) (g) 1.; relating to minor changes to fisheries administrative code.

**FH-12-14**

**Analysis Prepared by the Department of Natural Resources**

**1. Statutes Interpreted:** Sections 29.014(1), 29.041, and 29.053(2), Stats., have been interpreted as giving the department the authority to make changes to Wisconsin fishing rules.

**2. Statutory Authority:** Sections 29.014(1), 29.041, and 29.053(2), Stats.

**3. Explanation of Agency Authority:**

Section 29.014(1), Stats., directs the department to establish and maintain conditions governing the taking of fish that will conserve the fish supply and ensure the citizens of this state continued opportunities for good fishing.

Section 29.041, Stats., provides that the department may regulate fishing on and in all interstate boundary waters and outlying waters.

Section 29.053 (2), Stats., provides that the department may establish conditions governing the taking of fish for the state as a whole, for counties or parts of counties, or for waterbodies or parts of waterbodies.

**4. Related Statutes or Rules:**

If approved by the Natural Resources Board at its December meeting, the department will be concurrently proposing a rule (FH-14-14) that will make changes to fish size limits, bag limits, seasons, and other fishing regulations. The rule is being pursued to help meet management goals and objectives for waters and their fish species, such as providing a trophy walleye fishery or a bass fishery that maximizes predation on smaller fishes. The proposed regulations in FH-14-14 will be available for public review and comments at the Fish and Wildlife Spring Hearings held on the second Monday of April 2015.

**5. Plain Language Analysis:**

The proposed rule addresses minor changes to administrative code relating to the regulation of fishing. The rule is being pursued to ensure the rule language that governs fishing in inland, outlying, and boundary waters is accurate and properly reflects the desired management of Wisconsin waters. The objectives are to:

- remove sections of code that are outdated or have been replaced by other statute or code changes,
- correct errors that occurred during the drafting of rules, and
- add or repeal language to clarify intent of original rules.

SECTION 1 clarifies the boundaries around the Lake Winnebago System in which a spearer can possess an unregistered lake sturgeon. Updates are needed due to roadway construction and naming changes over

time.

SECTION 2 changes the Columbia Lake (Columbia County) 18" minimum length limit and 3 daily bag limit on hybrid striped bass to no minimum length, no bag limit. Hybrid striped bass are considered an invasive species under NR 40, Wis. Adm. Code, and are therefore no longer imported and stocked in any Wisconsin waters. The department would like to continue to allow catch and harvest of any existing striped bass in Columbia Lake under a no minimum length-no bag limit regulation. If striped bass were removed from listing in administrative code, there would be no open season and none could be harvested under NR 20.20 (73)(p), which states all species not listed in NR 20.20 have no open season.

SECTION 2 also removes the current harvest regulations (18-inch minimum length limit and 3 fish daily bag limit) for walleye on Silver Lake (Columbia County). The lake has not been stocked with walleye since 2000 and there is no longer a population of walleye in the lake. Therefore, the special regulation is no longer necessary and can be removed from the lake and from listing in the regulations booklet. The regulation will return to the general statewide walleye regulation of 15-inch minimum length limit and 5 fish daily bag limit.

SECTION 3 reinstates the allowance of night fishing on the Brule River in Douglas County downstream from Hwy 2 for all species during the regular trout open season (first Saturday in May - September 30). It prohibits night fishing during the early trout open season (last Saturday in March to May 4) and extended trout open season (October 1 to November 15). The current regulation is an error in code that occurred when the administrative code was revised in 1992, and subsequently re-formatted and further misinterpreted in 1999. Although the unintended error was codified in 1999, it was not published as such in the Trout Regulations Guide until the 2012-2013 fishing season, causing confusion among anglers and law enforcement. The current regulation prohibits anglers from fishing at night during the entire open season on the Brule, which reduces the overall number of harvest and catch-and-release opportunities, particularly for brown trout, which are most active during the night. Making this change will return the regulations to what is commonly understood and enforced.

SECTION 4, 6, and 8 amend trout stream names in code to accurately reflect common names and reduce angler confusion of where regulations begin and end. In La Crosse and Monroe counties, the code language is changed to say "Coon creek (Bohemian Valley Creek)" instead of Bohemian Valley Creek. In Vernon County, the code language is changed to specify naming and regulations on sections of Coon Creek, which crosses CTH P in more than one place, and Timber Coulee Creek.

SECTION 5 extends the boundary of Wisconsin River regulations (year-round open season on bass, pike, walleye) another 100 feet on the connecting Eau Claire River in Marathon County. The Wisconsin River regulations currently apply up to the first bridge on the Eau Claire River. This proposal extends the regulations another 100 feet to the Schofield Dam, which is a prominent boundary that boaters cannot travel past and is how it is currently listed in the regulations booklet. Law Enforcement also enforces Schofield Dam as the regulation boundary. This extension will provide additional fishing opportunity to that small area of the river without any biological concerns.

SECTION 7 and SECTION 9 change the regulations boundary between the Three Lakes Chain in Oneida County and the Eagle Chain in Vilas County from the county border to the Long Lake (Burnt Rollways) Dam in Oneida County. The dam has been used locally as a border and is a more obvious boundary to anglers rather than an invisible county line.

SECTION 10 changes all listing of the Neenah-Menasha dam to "dams" in 20.20(71). There are two waterways and two dams that should be clarified in code.

SECTION 10 also makes set pole/bank pole/setline fishing open seasons for catfish and rough fish the same throughout all Lake Winnebago System waters in Winnebago County. Currently all set pole/bank pole/setline regulations for rough fish and catfish in Lake Winnebago System waters are the same except for the stretch of water between Lake Butte des Morts and Eureka Dam, where a season is open for catfish and closed for rough fish. This was a result of inadvertent wording of code language and there is no biological or management reason for applying the differing regulations for these methods of fishing. This amendment will make regulations governing rough fish angling methods the same throughout all Lake Winnebago System waters of Winnebago County.

**6. Summary of, and Comparison with, Existing or Proposed Federal Statutes and Regulations:**

Authority to promulgate fishing regulations is granted to states. None of the proposed changes violate or conflict with federal regulations.

**7. Comparison with Similar Rules in Adjacent States:**

Fisheries management rules are generally similar in the states surrounding Wisconsin. Each bordering state regulates fishing by the use of seasons, bag limits and size limits. Specific seasons and bag and size limits may differ for species among the surrounding states, but the general principles are similar. Michigan, Minnesota, Iowa, and Illinois all have statewide seasons and bag and size limits for fish species, along with special or experimental regulations on individual waters.

**8. Summary of Factual Data and Analytical Methodologies:**

Fishing regulations, such as length and bag limits or season dates, are used as a tool to ensure good fishing exists into the future. The department has used different types of fishing regulations in order to: control angler impacts on fish populations; maintain numbers and sizes of fish in a lake or stream; provide different types of fishing experiences, such as fishing for dinner or for a trophy fish; and make access to fishing as fair as possible.

This rule includes minor changes to administrative code that support existing policies and fisheries management goals. The department took steps to insure the accuracy, integrity, objectivity and consistency of data were used in preparing the proposed rule and related analysis.

**9. Analysis and Supporting Documents Used to Determine the Effect on Small Business or in Preparation of an Economic Impact Report:**

The proposed rule will have minimal impact on sport anglers and is not expected to have an economic impact. As with any change in regulations, there will be a requirement for anglers to learn the new rules. However, a majority of this rule change clarifies code to reflect existing policies for which anglers must already comply. The department works to notify the public of new regulations via press releases, the internet, and fishing regulations pamphlets.

**10. Effect on Small Business (initial regulatory flexibility analysis):**

It is not expected that there will be any economic impact directly related to these rule changes. The department conducted an economic impact analysis (with a public comment period from December 4-18, 2014) and determined that no individuals, businesses, local governments, or other entities will be adversely affected economically. The proposed rule does not impose any compliance or reporting requirements on small businesses nor are any design or operational standards contained in the rule.

**11. Agency Contact Person:**

Kate Strom Hiorns
