200207

Currently the raccoon season ends January 31. Fox and coyote season runs thru Febuary 15. Incidental coon caught after January 31 are not legal fur and must be released. Raccoon breed in Febuary and become very active. Pelt quality on winter skins is desirable and in demand.

Fond Du Lac Co on April 16 2007 recommends that the Department of Natural Resources take action to correct this situation by introducing rule changes allowing an extension of the raccoon season thru February 15.
