

whereas the people of Grant County need additional deer hunting opportunities and the DNR no longer need refuges for deer

Proposed resolution to open Nelson Dewey State Park to deer hunting to help control the deer population. It will give hunters another place to hunt because private land open to hunting has been decreasing along with its impact on the recruitment of new hunters and the retention of current hunters.

Nelson Dewey State Park has a total of 755 acres and is in unit 73D.

In unit 73D two landowners own almost 2400 acres of prime hunting land where very limited or no hunting is allowed.
