BE IT REQUESTED or RESOLVED

That the State Conservation Congress meeting on Monday, April 16th, 7:00pm, 2007 at River View Middle School, 101 Oak St, Kaukauna, Wisconsin have the Wisconsin DNR consider these minor changes for the Catfish Bank Pole Line Fisherman as follows:

Allowing:

- Tying bank pole lines on natural vegetation with metal tag on line with white marker flag tied on line or staked within a foot of line attachment.
- White flag may be limber with tag number clearly printed on it.

Why this request:

Tying lines on natural vegetation reduces fish loss from hooks being ripped out of their mouths from rigid line tie-ons. This would assist the disabled Catfish Bank Pole fisherman more freedom to enjoy a longer period and increase their chances of catching a catfish when they get the chance to fish.

Thank you for these considerations,
