Title: CWD

The Problem:

Do to the total lack of results for the eradication of CWD the whole process should be eliminated due to the fact that we have more deer in the area now ~~than~~ when we started this process many years ago. It has never been proven the CWD has not been around for a millennium. It has also never been proven that CWD is not present in the rest of the state, with no ill effects. It has also never been proven that eating a CWD infected deer is harmful for human consumption. There might be ill effects from eating organs but simple education would eradicate that problem. The ~~cost~~<sup>effects</sup> of the eradication has cost millions and millions of dollars poorly spent with absolutely no results.

BE IT RESOLVED, that the Conservation Congress held in Clark County April 12, 2010 recommends that the Conservation Congress work with the Department to take action to correct this situation by totally eliminating all CWD programs.
