Northern Pike Daily Bag Limit Restriction on Caroline Pond, Shawano County, WI

The Problem:

A dwindling Northern Pike population in the area commonly called the Caroline pond and its immediate tributaries. These tributaries include the South Branch of the Embarrass River from the inlet to the pond upstream to the point of the crossing of the Shawano County Highway M Bridge and the Middle Branch of the Embarrass River from the inlet of the pond upstream to a point of the crossing of ATC-PAR high voltage transmission power lines. The downstream limit of the proposed area will be the Caroline dam.

Club Recommendation:

Because of the large increase in fishing pressure and the loss of habitat through sedimentation, the Caroline Conservation Club requests a daily bag limit of (3) Northern Pike per day per person on the above designated area. We have no recommendations on minimum or maximum length requirements on this proposal.
