DEER REGION DESIGNATIONS

Impose that the Southern Farm Region of the Deer Harvest Map be separate from the CWD zone.

The Problem

The CWD zone covers the majority of the Southern Farm region zone. The other part of this zone, which is unaffected by CWD, gets grouped into a DNR regulated area. The CWD area manipulates the harvest numbers compared to other areas in the state by allowing more tags and different hunting regulations.

RESOLUTION:

I propose the DNR create a separate zone for the CWD region for the Deer Harvest Map and keep those kill numbers separate from the rest of the Southern Farm Region zone.
