Create a Shooting Range Committee to study and advise the DNR about shooting ranges about Wisconsin Ranges and their needs

Wisconsin has several hundred shooting ranges in, the DNR does not have any established set of rules and regulations that help protect ranges and the club members. Pittman-Robertson funds that could be used for ranges are ignored. The excise tax that is collected on firearms to help improve and build new ranges and help purchase new equipment is not being used and we, as sportsmen and women are not receiving anything for the excise taxes we pay.

Be it resolved that the Conservation Congress at their annual meeting in Bayfield County on April 11, 2011 recommends that a Shooting Range Committee be created for the above reasons.
