Title: Bows arrows and crossbows Deer hunting

The Problem:

The 2010 Deer Hunting Regulations pamphlet Page 18 Bows Arrows and Crossbows

Whereas: To be legal for deer a crossbow must have a minimum draw of 100 pounds. While other bows need only 30 pounds draw weight and compound bows with a holding device are considered crossbows but are exempt from the 100-pound requirement.

Whereas: If 30 pound pull is adequate for compound and recurve bows. 100 pounds seems excessive for crossbows.

Cross bows are available with less than 100pounds draw weight. And would meet the other requirements required. Bolt length and broad head size

Therefore:

Be it resolved:

I request the draw weight for crossbows be changed to 50 pounds or greater.
