WI Bear Season

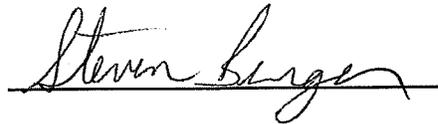

The Problem:

The Wisconsin bear season in zone C begins the Wednesday after Labor Day. The problem is that the corn can still be in a milk stage and the acorns start to drop and it is almost impossible to kill a bear over bait. If the season south of Highway 10 was to open two weeks earlier it would be more beneficial to harvesting a greater number of bear.

Therefore I recommend changing the season south of highway 10 to open two weeks earlier.

BE IT RESOLVED, that the Conservation Congress in Pepin County on April 11, 2016 recommends that the Conservation Congress work with the Department of Natural Resources and design a bear season south of highway 10 to open two weeks earlier than the normal zone C season.
