Intermunicipal Agreement Information

1. Will your municipality's stormwater be discharged to or through facilities of another municipality? Yes No
2. Will another municipality discharge stormwater to or through your facility? Yes No

If you answered "Yes" to either of the above two questions, you must submit an intermunicipal agreement. If the intermunicipal agreement sent with the application is not yet executed, you must submit an executed copy of it prior to preparation of the FAA.

Note: If your municipality is a metropolitan sewerage district or your municipality discharges to a metropolitan sewerage district, submit intermunicipal agreements and contracts with users only if the documents are new or changed since previous submittals.

Provide the CWFP project number under which the existing agreements and contracts were submitted:

CWFP Project No.

In your intermunicipal agreement you must:

- ✓ Identify ownership for each individual portion of the structural urban best management practice (BMP).
- ✓ Establish a term of agreement that is at least for the life of the loan.
- ✓ Require municipalities requesting funding for stormwater projects to adopt local regulations for construction sites and a municipal stormwater management plan and ordinance for new development and redevelopment.
- ✓ Demonstrate the basis for generating revenue for operation, maintenance, and replacement costs based on actual use, and indicate who is responsible for paying charges.
- ✓ Indicate the method for generating revenue for capital costs and who is responsible for payment.
- ✓ Indicate that the owner of the regional facility shall accept the applicant's urban runoff and identify the boundary from which the applicant's discharge originates.
- ✓ Require each entity to adopt a user charge system and stormwater ordinance.

Notes Regarding Loan Payment Estimate:

- 1) For the "Projected CWFP Loan Payment" estimate, contact DNR to obtain the current loan program interest rates. Then using the Parallel Cost Percentage, blend the applicable interest rates to arrive at a blended interest rate for the loan. You may want to round this blended interest rate up in order to allow some cushion in case the program interest rates change prior to the loan closing.
- 2) The loan term may not exceed 20 years from the date of the loan closing and must end on a May 1st principal payment date. Accordingly, if the loan is for 20 years but there is 1+ years of construction before the principal payments start, then the loan will be amortized over 19 years (i.e., 19 principal payments) rather than 20 years. In calculating your estimated loan payment, you will need to consider the length of the project construction period in order to determine the number of years remaining to amortize the loan since this affects the size of the loan payment.
