

**Title:** Elimination of trapping hour restrictions.

**The Problem:**

Current law prohibits trapping activity between the hours of 8pm and 4am. The law has no biological basis and limits otherwise lawful trapping opportunities.

Obligations such as work hours often interfere with a trapper's ability to lawfully maintain a trap line under the current 4am to 8pm trapping hours.

BE IT RESOLVED, that the Conservation Congress at its annual meeting held in Kewaunee County on April 8<sup>th</sup>, 2013 recommends that's the Conservation Congress work with the Department to take action to correct this situation by introducing a rule change to eliminate trapping hour restrictions.
