Whereas Polk, Burnett and Barron Counties are deemed CWD areas due to one deer testing positive for CWD in another county, the said county of Washburn; we are requesting Polk Burnett and Barron be exempted from CWD restrictions ie baiting, feeding deer and euthanizing fawns. Thereas CWD is cropping up in new eastern areas of the state we would propose strict restrictions on the release area of fawns. The attached list of people signed their concerns to change the old admin DNR restrictions on CWD areas. We are all concerned with our deer herds and the economic impact that could occur if the restrictions are kept in place in our area. I would like this presented at the Spring Hearing, Thank You!

Sincerely
