Proposal

Upon application, any resident landowner is issued a minimum of two free antlerless permits for every forty acre parcel owned with 25+ acres of agriculture land. Maximum permits available to be determined by DNR biologists. Permits should be valid concurrently with all deer seasons. These permits/tags can be given out by landowner as desired but not sold.

Problem: Deer concentrated on private parcels with ag land and not enough hunter access.

Be it resolved if this proposal be accepted landowner can have some control of deer numbers and possibly open to more hunters.
