Resolution: Palmer/Tenderfoot Lakes, Vilas County

Where as Palmer and Tenderfoot lakes have consistently shown the ability to grow large, over twelve (12) inches, crappie and large numbers of them.

Where as the quality of the crappie fishere is deteriorating due to heavy angling pressure and harvest through out the year.

Therefore the Department of Natural Resources shall establish a daily bag limit of ten (10) crappie for Palmer and Tenderfoot Lakes combined, and a minimum size limit of ten (10) inches to again establish a quality crappie population.

Respectfully submitted April 9, 2012,

Duane Harpster, Boulder Jct.
