

Wisconsin 90% Mercury Reduction Rule

2010 – 2014
Four Major Utilities Achieve a 40% Mercury Emission Reduction from the Baseline Established in the Current State Rule for their Existing EGUs

2015 – 2017
Small EGUs (25 MW to 150 MW) Meet BACT for Hg
Large EGUs (150 MW and larger) Achieve 90% Hg or Follow Multipollutant Path

2018 – 2021

2021 and thereafter
