Subject: RE: Former WPS Marinette MGP - October 2019 Groundwater Monitoring Event

Hello Frank,

Thank you for letting us know. Hope the team stays safe and dry out there!

Best regards,
Margaret

Subject: Former WPS Marinette MGP - October 2019 Groundwater Monitoring Event

Hi Margaret,

As you know, our field crew is out sampling at Marinette yesterday and today. During initial well gauging, the two wells along the shoreline (MW01R and MW312) were observed to be in standing water, resulting from a high river level. These wells are approximately 40 feet riverward of the new edge of water. See attached photo.

Historically these wells have been below reporting limits for MGP COPCs. Due to safety concerns and the obvious inability to access the well caps, these wells will not be sampled this round. Delineation of the affected groundwater at MW311 for this sampling round will be completed by results from MW307R. Please feel free to contact me if there are any questions or if additional information may be needed.

Thanks,

Frank Dombrowski
