Hello Frank,

No major comments regarding sampling on the FMMC property.

Let me know how you decide to proceed with sample analysis (consistent with the other samples, or not).

Also let me know if you have any questions.

Kind regards,
Margaret

Subject: Comments on the *Preliminary Design Investigation Work Plan – Addendum, Marinette Former Manufactured Gas Plant Site, Wisconsin Public Service Corporation, Marinette, Wisconsin*

Dear Mr. Dombrowski,

EPA and Wisconsin DNR (The Agencies) reviewed the *Preliminary Design Investigation (PDI) Work Plan Addendum (PDI Addendum), Marinette Former Manufactured Gas Plant (MGP) Site, Wisconsin Public Service Corporation, Marinette, Wisconsin*, dated June 24, 2020 prepared by Ramboll., on behalf of Wisconsin Energy Corporation.

The Agencies have the following recommendations and comments:

In order to be consistent with PDI WP Rev. 2 and samples already collected/analyzed, it is recommended that additional soil samples include total organic carbon (TOC) analysis.

If you have any questions, don't hesitate to contact me.

Best regards,

A handwritten signature in blue ink, appearing to read "Margaret Gielniewski".
